

PUBLIC TRANSPARENCY REPORT

2023

Navigera AB

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Navigera views investments from a holistic perspective with the dimensions: return, risk and impact on sustainability factors. We believe we have a responsibility as a professional asset manager to assure that we invest for the benefit of a sustainable future. At the same time, we believe that aligning investments with the necessary transitions needed will result in superior returns for our clients.

As a financial actor, we can contribute to sustainable societal development by channelling capital to sustainable investments. We do this by offering investment options that maintain an adequate level of sustainability, as well as making it easier for our clients to choose sustainable products.

Our funds are managed with different levels of sustainability ambition and ESG integration: basic, enhanced, focused and impact. We currently have no active strategies within the impact category. The primary methods for ESG integration are criteria for exclusion, inclusion and engagement. We work closely with partners with a view on responsible investment that matches ours and with capabilities that complement ours. We consider adverse impacts on sustainability factors in our investment decisions and portfolio management.

Aside from the PRI commitment, we are members of Swesif, as well as signatory to the Net Zero Asset Managers Initiative as of 2022.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

During 2022 we have made an overview of our sustainability and responsible investment approach, in order to work strategically and systematically with ESG integration, analysis and reporting.

Examples of our progress are:

- Deepened partnership with the Danish asset managers Qblue Balanced, whose proprietary three-dimensional analytical model we apply to a range of our funds
- Launch of two new article 9 funds with sustainable investments as their objective: A Swedish and Nordic small-cap fund together managed by Carnegie Fonder and a global small cap fund managed by Qblue Balanced
- Overview and updates of policies and processes for internal control, sustainability risk and sustainability due diligence as well as trainings to relevant staff, including the board.
- Supplementing the range of ESG analytical tools with additional subscriptions
- Signatory to Net Zero Asset Managers Initiative as of April 2022.

Section 3. Next steps

■ What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

- Align commitments and processes with Naventi Fonder AB as part of the post-merger integration process
- Further update our Responsible Investment framework and related policies to create a more coherent approach
- Integration of ESG analytical tools into a larger part of the product offering
- Attention and resources to monitor and comply to developments within the EU Sustainable Finance regulation
- Outlining our path to net zero as part of the Net Zero Asset Managers commitment
